our products

postural seating

We prioritise good posture as essential for specialised seating for children with additional needs. Our seating enhances everyday life by:

- helping children focus on tasks;
- promoting social interaction with peers;
- reducing digestive discomfort during meals;
- allowing relaxation by alleviating poor posture strains.

This leads to happier, more confident children. We offer customisable products to meet individual needs and encourage discussions about customisation. We're also proud to offer Levitex pressure care relief technology into our postural support seating.

standing

Standing with Smirthwaite standers offers numerous advantages, such as:

- enhancing joint development;
- promoting mid-line symmetry;
- improving body & shoulder stability, which enhances head control;
- enabling children to engage with friends at an equal level;
- boosting children's sense of maturity & confidence;
- supporting physical & social growth.

changing & showering

Our pediatric changing tables and showering products empower users towards greater independence. Designed with care givers in mind, they inspire confidence in those assisting. We have meticulously crafted a selection of products to simplify your life. Some of our changing tables are mobile and installation-free. Our offerings cater to both wet and dry environments and accommodate all budgets.

our products

toileting & bathing

Our toileting and bath chair products are designed for children from an early age, ensuring life is easier for parents. These products transform bath time into a fun and engaging experience by minimizing frustration for everyone involved.

The toileting chairs are freestanding and supportive, seamlessly fitting in nursery, school, and home settings. For added privacy, our potty chair features high sides. Available in a variety of colors, they provide a fresh alternative to regular chairs. Our two bath chair variations are lightweight, compact, and compatible with a wide range of baths.

tables & desks

Our children's desks and tables are crafted to seamlessly integrate into any home or school setting, including compatibility with our seats. Most of our desks and tables offer adjustable features like tiltable surfaces and height modifications, ensuring an ideal fit for your child. Thoughtfully designed for both school and home, the modern elegance of wood and durable construction ensure our desks endure over time.

plus range

Recognising the increasing need for bespoke plus solutions, Smirthwaite is proud to introduce a range of products designed to enhance plus sized individuals' quality of life, making clear a difference by contributing to happier and more fulfilling lives.

From plus sized postural support chairs to heavy duty changing benches with larger weight and height requirements. Our plus range offers a selection of solutions to meet the unique needs of plus sized individuals in both school and home environments.

about us

Smirthwaite USA LLC is dedicated to enriching the lives of children with additional needs. We provide high-quality, bespoke and user-friendly pediatric equipment designed to support their physical and emotional development.
