

★ asiento

3 designed specifically for plus sized children, teenagers and adults with moderate to complex needs

MADE IN BRITAIN

 **smirthwaite**
a prismhealthcare company

smirthwaite.com

key features

- ★ **Durable** - accessories attach to a strong central column.
- ★ Optional **dynamic back** adjusts pressure for desired movement, aiding users needing sensory & physical feedback.
- ★ **Closer contact** - open chassis design & pushbike handles enable carers to get close to the backrest, beneficial for upper-limb therapy, care administration & calming users after an epileptic fit or during anxiety.

key benefits

- ★ Created to achieve improved postural support and symmetry, the Asiento delivers many benefits to the user and those around them, including:
 - enhanced eye contact and communication
 - improved interaction, breathing and eating
 - greater participation in play and activities.
- ★ **Levitex** technology is available as an optional extra.

★ hardrock

5 an extremely durable chair for children & adults who are prone to rock

MADE IN BRITAIN

smirthwaite
a prismhealthcare company

smirthwaite.com

key features

- ★ **Tray** provides trunk support & can be used for activities, playing & feeding
- ★ **Anti thrust cushions** provides secure postural management
- ★ **4-point pelvic strap** provides firm support to stabilise hip position
- ★ **Mobile base & push handle** enables individual to be easily moved whilst seated

key benefits

- ★ **Robust & durable** – specifically designed for children to young adults who are prone to rock repetitively. It provides moderate levels of postural support and is suitable for both school and home environments.
- ★ **Tailored to child's needs** - it can be a challenge to engage children with complex learning difficulties in educational & everyday activities. The Hardrock tackles this issue and offers a positive solution. It provides a safe environment and one that is conducive to learning.
- ★ **Posture matters** - uses an anti-thrust system and anterior pad to provide secure postural management within clearly defined boundaries. Thoracic supports and stabilisers are available for children who exhibit sideways motion.
- ★ **Levitex technology** is available as an added extra.
